

## LAB SAFETY RULES

*You must have a signed copy of this form on file to work in the laboratory.*

The safety policies and procedures listed below must be followed in the laboratory. Failure to comply with these rules may result in dismissal or suspension from the laboratory.

- Be aware of the locations of fire extinguishers and first aid kits.
- The emergency telephone is in the hallway (dial 911 for emergencies).
- For non-emergency issues dial 8-5454 to contact campus police.
- All accidents or injuries, however slight, must immediately be called to the attention of the laboratory instructor who will advise the student on the course of action to be taken.
- Unauthorized experiments are prohibited. Follow the laboratory directions carefully.
- Food and beverages are prohibited in the laboratory.
- Do not remove any laboratory equipment or supplies from the laboratory.
- Never work in the laboratory without supervision.
- Never look directly into a laser beam or point a laser beam at someone else.
- Use care when handling electrical equipment in order to avoid electrical shock.
- Notify the instructor in case of damaged power cords or other problems with electrical equipment.
- Careless acts are prohibited.

I have read and understand these rules and agree follow them to the best of my ability.
