Exam 2	2	FO	RM	I B
--------	---	----	----	-----

Name_____

MULTIPLE CHOICE. Choose the one alternative that best completes the statement or answers the question.

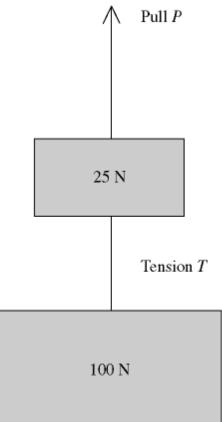

- - A) 6.67 m/s² upward.
 - B) 6.67 m/s² downward.
 - C) 9.80 m/s² downward.
 - D) 3.13 m/s^2 downward.
 - E) zero.
- 2) A rock is thrown at a window that is located 18.0 m above the ground. The rock is thrown at an angle of 40.0° above horizontal. The rock is thrown from a height of 2.00 m above the ground with a speed of 30.0 m/s and experiences no appreciable air resistance. If the rock strikes the window on its upward trajectory, from what horizontal distance from the window was it released?
 A) 27.3 m
 B) 53.2 m
 C) 48.7 m
 D) 29.8 m
 E) 71.6 m

5)

- 5) A catapult is tested by Roman legionnaires. They tabulate the results in a papyrus and 2000 years later the archaeological team reads (distances translated into modern units): Range = 0.20 km; angle of launch = $\pi/4$; landing height = launch height. What is the initial velocity of launch of the boulders if air resistance is negligible? A) 0.69 m/s B) 1.4 m/s C) 22 m/s D) 44 m/s
 - 1

		Exam 2 FORM	В		
6) You slam on the brakes of your car in a panic, and skid a certain distance on a straight, level road. If you had been traveling twice as fast, what distance would the car have skidded, under identical conditions?					6)
A) It would have sl	kidded $\sqrt{2}$ times fai	rther.			
	kidded 2 times farth				
C) It would have sl	kidded 1/2 as far.				
D) It would have sl	kidded 1/ $\sqrt{2}$ times	farther.			
	kidded 4 times farth				
 7) On a smooth horizonta that is initially stational same speed. Ignoring f A) momentum only B) kinetic energy o C) momentum and D) momentum and E) momentum and 	ary. When the spring friction, what is cons y only l potential energy	g is most compre served during th	ssed, both objects		7)
8) An 1100-kg car traveli m. What is the magnit	0			mplete stop in 578	8)
A) 340 N	B) 550 N	C) 41	•	D) 690 N	
9) A crane lifts a 425 kg s do on the beam if the b	•				9)
	-		U		
A) 4.9 ×10 ⁵ J	B) 4.0 ×10 ⁵ J	C) 5.	8 ×10 ⁻⁵ J	D) 3.4 ×10 ⁵ J	
10) A force on a particle de particle constrained to moves from <i>x</i> = 0.00 mA) 24.0 J	move along the x-a				10)
	_,,	-,,	2,200	2, 10.0 ,	
11) It requires 49 J of work 2.9 m. What is the valu A) 15 N/m		stant of this sprir		1.4 m to a length of D) 29 N/m	11)
<i>ii, io ii, ii</i>	Σ , Σ i i i iii	C) 1	/		

A) P = T + 25 N B) P = T + 100 N C) P + T = 125 N D) T > PE) T = P

- 13) On a horizontal frictionless floor, a worker of weight 0.900 kN pushes horizontally with a force13) of 0.200 kN on a box weighing 1.80 kN. As a result of this push, which statement could be true?
 - A) The box will not move because the push is less than its weight.
 - B) The worker and box will both have an acceleration of 2.17 m/s², but in opposite directions.
 - C) The worker will accelerate at 1.08 m/s^2 and the box will accelerate at 2.17 m/s^2 , but in opposite directions.
 - D) The worker will accelerate at 2.17 m/s² and the box will accelerate at 1.08 m/s², but in opposite directions.
 - E) The worker and box will both have an acceleration of 1.08 m/s², but in opposite directions.

14) Two objects, each of weight *W*, hang vertically by spring scales as shown in the figure. The pulleys and the strings attached to the objects have negligible weight, and there is no appreciable friction in the pulleys. The reading in each scale is

A) 2W.

B) more than 2W.

C) more than *W*, but not quite twice as much.

- D) W.
- E) less than W.

15) A 2.00-kg object traveling east at 20.0 m/s collides with a 3.00-kg object traveling west at 10.0					15)
m/s. After the collision, the 2.00-kg object has a velocity 5.00 m/s to the west. How much					
kinetic energy wa	s lost during the coll	lision?			
A) 516 J	B) 458 J	C) 91.7 J	D) 0.000 J	E) 175 J	
05	0		D) 0.000 J	E) 175 J	

- 16) A 6.0 kg box slides down an inclined plane that makes an angle of 39° with the horizontal. If the 16) _____ coefficient of kinetic friction is 0.19, at what rate does the box accelerate down the slope?
 - A) 6.2 m/s^2 B) 4.7 m/s^2 C) 5.2 m/s^2 D) 5.5 m/s^2
- 17) Is it possible for a system to have negative potential energy?
 - A) Yes, as long as the total energy is positive.
 - B) No, because this would have no physical meaning.
 - C) Yes, since the choice of the zero of potential energy is arbitrary.
 - D) Yes, as long as the kinetic energy is positive.
 - E) No, because the kinetic energy of a system must equal its potential energy.
- 18) A boy throws a rock with an initial velocity of 2.15 m/s at 30.0° above the horizontal. If air resistance is negligible, how long does it take for the rock to reach the maximum height of its trajectory?
 A) 0.215 s
 B) 0.194 s
 C) 0.303 s
 D) 0.110 s
- 19) Alice and Tom dive from an overhang into the lake below. Tom simply drops straight down from 19) ______
 the edge, but Alice takes a running start and jumps with an initial horizontal velocity of 25 m/s. Neither person experiences any significant air resistance. Just as they reach the lake below
 - A) the splashdown speed of Alice is larger than that of Tom.
 - B) the speed of Tom will always be 9.8 m/s larger than that of Alice.
 - C) they will both have the same speed.
 - D) the speed of Alice will always be 25 m/s larger than that of Tom.
 - E) the speed of Alice is larger than that of Tom.

14) _____

17)

20) A rescue plane flying horizontally at 72.6 m/s spots a survivor in the ocean 182 m directly below		20)			
and releases an emergency kit with a parachute. Because of the shape of the parachute, it experiences insignificant horizontal air resistance. If the kit descends with a constant vertical					
	acceleration of 5.82 m/s ²				
	A) 406 m	B) 602 m	C) 4.54 km	D) 574 m	
21) If electricity costs 6.00 ¢/kWh (kilowatt-hour), how much would it cost you to run a 120 W stereo system 4.0 hours per day for 4.0 weeks?			st you to run a 120 W	21)	
	A) \$1.38	B) \$0.81	C) \$0.12	D) \$2.27	
22)	Consider what happens v accurate statement?	when you jump up in	the air. Which of the fol	lowing is the most	22)
	A) When you push do push back with theB) It is the upward fo exceed your weigh	e same magnitude force rce exerted by the gro at.	e and thus propel you i und that pushes you up		
	than the downwar D) Since the ground is into the air. Instead propels your body	d force you exert on the stationary, it cannot on the internal force into the air.	he earth. exert the upward force t es of your muscles actin	necessary to propel you ng on your body itself that	
	E) When you jump uj earth. You go up b	-	rce F ₁ on you and you e	xert a force <i>F</i> ² on the	
23)	A baseball is thrown vert			<u> </u>	23)
	B) its kinetic energy i	s conserved, but its m	onserved, buts its mom omentum is not conserv		
	C) both its momentur D) both its momentur				
			nechanical energy is co	nserved.	
	A 7.0-kg object is acted of	•		•	24)
	Which of the following fo toward the east? A) 9.0 N west B) 12 N east C) 7.0 N west	orces is the other force	if the acceleration of th	e object is 1.0 m/s ²	
	D) 6.0 N east				
	E) 3.0 N west				
25)	A 60.0-kg person drops f by an ideal stiff spring of		*	negligible mass supported	25)
	to rest. What is the spring	00	· •	betote the person comes	
	A) 5.45 × 10 ⁴ N/m B) 4.12 × 10 ⁵ N/m				
	D) 4.12 × 10° N/m				

- C) $8.83 \times 10^4 \,\text{N/m}$
- D) $3.92 \times 10^5 \text{ N/m}$
- E) $2.56 \times 10^5 \text{ N/m}$

Formula sheet

basics

$$g=|\vec{a}_{\rm free \ fall}|=9.81\,{\rm m/s}^2 \quad {\rm near \ earth's \ surface}$$
